Aditia Dika Putra Laksamana

23 y.o | Banjarbaru, Indonesia | 0822-1887-0626 | aditiadika256@gmail.com

Summary

An accomplished Information Systems graduate, I, Aditia Dika, am a dedicated professional targeting a challenging role in data science and artificial intelligence. My academic background and technical expertise position me as a promising data scientist committed to leveraging advanced analytical techniques to derive meaningful insights and drive strategic decision-making. With a comprehensive understanding of data manipulation, machine learning algorithms, and predictive modeling, I am enthusiastic about applying my skills to transform complex datasets into actionable intelligence for organizations. Excited to contribute as a collaborative team member, I am driven to make impactful contributions that directly drive business growth and technological innovation.

Experiences

Faculty of Applied Science, Telkom University – Bandung (September 2022 – June 2024)
Practicum Assistant (Data Science-Python, Database-MySQL, Computer Architecture & Networks, Programming Algorithms-Python, Web Development-PHP)

- Preparing study materials. exam questions and equipment.
- Providing guidance for complex assignments
- Collaborate with other people to achieve the desired learning outcome.
- Assist students during their practical sessions.
- Assessing student progress.

Research Collaboration Smart Farming & Precision Agiculture Projects, BRIN – Bandung (September 2023 – November 2024)
Data Scientist (Classification of plant health levels using Multispectral Camera based on Normalized Difference Vegetation Index)

- Gathering requirement and collecting raw data.
- Analyze and process image data with RGN format.
- Create a dataset from processed data.
- Analyze and modeling from processed data for classification using CNN based architecture.
- Collaborate with IoT team to integrate all modules.

Kantor Pelayanan Kekayaan Negara dan Lelang – Bandung, Remote (January – July 2022)
Full-Stack Web Developer (Developing performance dashboard and task management for internal office)

- Gathering user requirement for Landing Page and Monitoring Application KPKNL Bandung.
- Analyze and modeling running business processes and proposals
- Analyze, modeling, and building the application with Use Case, Activity, UML, ER Diagram.
- Designing wireframes using Balsamiq.
- Designing mockup and prototype using Figma.
- Developing the application using PHP, Js, bootstrap (Codeigniter4), and MySql for database.
- Integration and deployment using 3rd party hosting,

Educations

Telkom University – Bandung (2019 - 2022)
Associate of information system, GPA 3.83
Final Project : Landing Page KPKNL Bandung In The Module Of Daily Activity Monitoring System (DAMS) – Full Stack Web Development

Telkom University – Bandung (2022 - 2024)
Bachelor of information system, GPA 3.77
Final Project : Implementation Of CNN-EfficientNetB3 For Chili Plant Health Classification Based On Vegetation Index Images Using Multispectral Camera – Intelligence System Development

Certificate

- Associate Data Science – BNSP (2023)
- Junior Web Developer – BNSP (2021)
- Machine Learning Foundations: A Case Study Approach – Coursera (2021)
- Artificial Intelligence with Machine Learning in Java – Oracle Academy (2024)

Skills

Hard Skills/Tools

- Programming (Python, Java, PHP, Javascript)
- Database (MySQL, ERD)
- UML (Use Case Diagram, Activity Diagram, Class Diagram, Sequence Diagram)
- Data Analysis (Mining, Statistical Analysis, Visualization)
- Intelligence System (Machine & Deep learning, Computer Vision)
- Business Analysis (BPMN, Business Intelligence)

Soft Skills

- Problem solving
- Critical thinking
- Communication
- Team coordination and collaboration
- Adaptability
- Learner’s mindset
